Security Spotlight

With transaction fraud on the rise, we recommend a few tips you should follow. **Know what to look for.** Be aware of skimmers used at ATM machines and gas pumps. Skimmers are small electronic devices that fit over the slot where your card would be inserted. You can gently pull on the area to see if it moves or comes away. If this happens, it may be a skimming device. **Look for hidden Cameras.** Criminals use pinhole size cameras to get your information. It's best to cover the keypad with your hand when entering your pin number. **Check the keypad itself.** Check for anything that seems out of place or unusual. **Know your surroundings.** Busy machines are the ones most likely to be targeted by criminals. Make sure you are in view of security cameras and you have sufficient lighting in the area. If you don't feel safe, you should leave.
